

Instant heating

Instant water heating technology ensures continuous warm water through out the wash coupled with superb energy efficiency.

Heated seat

Seat temperature adjustable to each individual users preference.

Aerated wash

Aerated water for enhanced cleansing

Oscillation

Nozzle indexes back and forth for massage and greater cleansing

Self-cleaning

Nozzle cleaning function operates before and after each wash cycle for optimum hygiene.

Self-diagnosis

Self diagnosis function continuously monitors operation

Occupied seat sensor

Sensor detects seat is occupied, preventing erroneous operation

Child settings

Reduced settings on water pressure and temperature, nozzle moves further forward, reduces by 4°C

Pulsation

Pulse wash, water jet pressure cycles between weak and strong.

Nozzle position control

Nozzle position, adjustable to each users preference.

Oscillation width control

Oscillation, length of stroke can be adjusted to the users preference

Learning energy save

Intelligent energy saving, analyses weekly usage patterns for optimum energy saving.

Compact design

Sleek low profile compact design, only 145 mm

One touch release

Easy Installation and detachment for ease of cleaning and relocation if and when required.
