

MOUNTING & RAPID SL

Where can I find the technical details?

You can download our brochure for all technical details. Or you can also look up our product detail page.

Is the installation complex?

The installation should be carried out by a qualified, professional installer. You can find a specialist installer near

Why is the Rapid SL frame number 39128001 not the same as the 39128000? Both are for the Sensia Arena®

The water and electricity line connection placements are different on the 39128001 and 39128000. The 39128001 is suitable for both the Sensia Arena® and IGS® , whereas the 39128000 is only suitable for the

How does the wall-hung Sensia Arena®'s automatic flush work?

Sensia Arena®'s automatic flush function will work only after you fit the automatic flush connection kit number 46944000. The sensor will detect you approaching and run the automatic cleaning programme. You can also set it so that the toilet flushes automatically when you stand up. You can also control the flush via the smartphone

What models are compatible with automatic flush kit number 46944000?

You can install the automatic flush kit with all GROHE Rapid SL GD2 cisterns.

What is the minimum height at which the wall-hung Sensia Arena® shower toilet may be fitted? What is the

The height depends on the mounting frame you choose - these have standard placements. The seat height is 445mm based on the average frame.

Does the ceramic toilet bowl fixed into the Sensia Arena® shower toilet from below or above?

From above.

Does the Sensia Arena® shower toilet come with a delivery pipe and all the other parts for connecting it to mains

Yes, the Sensia Arena® shower toilet comes with an electricity cable and connecting socket, T-valve, flexible hose and angle valve. The inlet pipe and discharge pipe are not included as those come with the Rapid SL
