Technical Drawing

Installation Steps

1. Check whether the seat cover fits the toilet, and the distance between two mounting holes of the toilet. Make sure no significantly deformation of the toilet.

2. Make sure there is a water connector near the toilet / cistern for supplying water to the bidet.

3. Remove the fixing plate from the seat cover

4. Installation of hinges

① Assemble hinges and fixing plate according to the figure above

② Install the fixing plate with gaskets on the toilet and align the mounting holes

③ Tilt the toggle plates of the hinges and insert the hinges into the toilet mounting holes

④ Lift upward the hinges and then crew the nuts

⑤ Finish installation of the hinges

5. Installation of water supply hose

Connect G 3/8 connector with water inlet joint of seat cover

Rotate the nut clockwise until it is locked

6. Installation of seat cover

Align the seat cover to the fixing plate

Push seat cover forward until hearing "click"

Connect the water supply hose to the water connector on the wall

Hidden connection for bottom entry unit with supplied t piece, flexi hose with valve

Washing mode

Rotate the knob in the clockwise direction to activate washing function.
(Note: be aware of the washing flow rate when start the washing, to avoid the uncomfortable washing experience.)

Rotate the inner knob ring in the clockwise direction to adjust the nozzle position

Cleaning

Do not use the cleaning agents of NaCO_3 、 NaOH to clean the seat cover and just clean the seat cover with soft cloths.

Remove the nozzle regularly for cleaning or replace it with a new one

Remove the seat cover
